

ORDER CONTROL

Contract seeds every field; submitted technical measure overrides only supplied fields.

|                                             |                                                           |                              |                                            |
|---------------------------------------------|-----------------------------------------------------------|------------------------------|--------------------------------------------|
| Customer name *                             | {{CUSTOMER_NAME}}<br>REQUIRED                             | CRM customer ID *            | {{CRM_CUSTOMER_ID}}<br>REQUIRED            |

PRECEDENCE AND RELEASE GATE

|                  |                                                                                                                      |
|------------------|----------------------------------------------------------------------------------------------------------------------|
| NO MEASURE       | Signed contract is the authoritative order source.                                                                   |
| MEASURE REQUIRED | Contract pre-populates the packet; submitted technical measure overwrites matching fields and adds measured details. |
| CONFLICT         | Never silently choose. Record both values and route the line to ORDER REVIEW.                                        |
| RELEASE          | All required fields, option dependencies, and manufacturer compatibility checks must pass before portal entry.       |
